[Patchday: Updates For Windows 7 8.1 Server \(10 09 2018\)](#)

1

Down-level Phase

Update via WU – Finalize phase

The screenshot displays the Windows Update settings page. On the left is a navigation pane with options like 'Home', 'Windows Update', 'Windows Defender', 'Backup', 'Troubleshoot', 'Recovery', 'Activation', 'Find My Device', 'For developers', and 'Windows Insider Program'. The main content area is titled 'Windows Update' and shows the 'Update status' section. It indicates that a restart is required to finish installing the following updates, specifically 'Windows Insider Preview KB251088 (in preview)'. A 'Restart now' button is visible. Below this is the 'Update settings' section, which explains that Windows will automatically download and install updates, except on metered connections. A large blue dialog box is overlaid on the screen, displaying the text: 'Configuring update for Windows 10', '0% complete', and 'Do not turn off your computer'. On the right side of the update status area, there are links for 'Schedule convenient updates', 'See what's new in this update', 'Looking for info on the latest updates?', 'Related info', 'Have a question?', and 'Make Windows better'.
